FOREIGN SECURITY ISSUES SOLD IN THE UNITED STATES

The accompanying tables detail certain securities transactions in the American capital market by foreigners. Included are all issues registered with the Securities and Exchange Commission for sale to the American public, and also issues placed privately with a sample of American life insurance companies who voluntarily report their private placements to the Commission. In private placements, only the portion of the issue which is actually reported as taken down is included in the figures. American Depository Receipts are not included, nor are secondary offerings. Issues by enterprises which are either wholly or partially state-owned but which operate in the transportation industry are entered on the tables as corporate securities and are noted with an asterisk (*).

The two-letter code used to identify the country of origin of each security was developed for the National Bureau of Standards by the Department of State. A summary of these codes is included with the tables; more detailed information can be found in "Federal Information Processing Standards Publication 10", available from the Superintendent of Documents, Washington, D.C.
